

# Socrates

**Socrates was like a curious detective, always looking for new answers and ways to understand the world. His way of thinking helped shape the way we think about important ideas and how we learn from each other.**

Fun Facts:

**Socrates was born in Athens, Greece, around 470 BC.**

**He didn't write books, but his ideas were passed down by his students, like Plato.**

**Socrates loved to ask questions and have conversations with people to learn new things.**

Timelines:

**Around 470 BC: Socrates is born in Athens, Greece.**

**400s BC: He becomes known for his clever way of thinking and talking to people.**

**399 BC: Sadly, Socrates is put on trial for his ideas and sentenced to drink a special poison.**

**His Legacy: Even though he didn't write books, his students like Plato wrote down his ideas, and they spread throughout history.**

Impact on the World:

**Socrates was a thinker who changed how people saw the world and themselves:**

**Questioning Everything:** He believed it was important to question and think deeply about things to learn and grow.

**Teaching Style:** Instead of giving answers, Socrates would help people discover their own answers by asking them thought-provoking questions.

**Philosophy:** He's considered one of the first philosophers, or people who study and think about big questions.

**Inspiring Others:** Socrates inspired many other philosophers and thinkers, and his ideas still influence how we think today.
